

Transform TLS/SSL Certificate Management with a Powerful Automation API

✓ **Automatically Manage Certificate Life Cycles**

Simplify the time-consuming manual process of purchasing, uploading, and renewing TLS/SSL certificates with Markmonitor's innovative Application Programming Interface (API).

Streamline your digital certificate management to easily provision, manage, and deploy public and private TLS/SSL certificates.

✓ **Flexible Automation, Seamless Integration**

- Our Secure Certificate API helps automate many aspects of the lifecycle of TLS/SSL certificates, empowering IT security professionals to focus on strategic initiatives rather than routine tasks.
- Take control of your workflows by integrating our API with your favorite tools.

✓ **Easy Certificate Management and Renewal**

- You can use our system to create, modify, and revoke certificates as per your requirements.
- With your own key management and certificate installation, enable set-and-forget renewals.
- Build into popular Public Key Infrastructure (PKI) solutions like AppViewX , KeyFactor or Venafi™

✓ **Keep Track of Your Assets in One Central Location**

- Fully account for your entire certificate portfolio. Easily monitor, manage, and report on your certificates.
- Combine certs and domains to gain a holistic view of your digital landscape.
- Simplified and secure audit process, providing quick access to all necessary info.

✓ **Choose From Many Validation Levels**

- Enable easy domain validation (DV) with DNS-based challenges.
- Use Organization Validation (OV) for rapid fulfillment.
- Select Extended Validation (EV) for ultimate trust.

✓ **Never Let an Important Certificate Expire**

- Prevent website outages by automatically renewing TLS/SSL certificates.
- Ensure that infrastructure endpoints such as VPNs or domain controllers remain secure.
- Generate personalized reports or notifications for your crucial resources.

✓ **Create Custom Workflows with Unrivalled Support**

- Integrate into your favorite ticketing system like ServiceNow.
- Require approvals, then automatically submit orders.
- Rely on Markmonitor's world-class 24x7 service and support.

Features:

- Import certificates into your Security Information and Event Management system (SIEM)
- Retrieve full audit logs of user and API-generated activity
- Verify Certificate Signing Requests (CSRs)
- Use the latest encryption standards such as Elliptic Curve Cryptography (ECC)
- Add domains to a single certificate with Subject Alternative Names (SAN values)
- Embrace DevOps with a modern, cloud-ready interface
