

Rapid, Secure DNS Resolution Across the Globe

Markmonitor Premium DNS lets global organizations manage DNS for sites requiring maximum accessibility and uptime with 25 strategically placed network nodes; 16 global locations; VLAN connections and an additional 7 IXPs.

✓ **Why Choose Markmonitor's Premium DNS?**

World-Class Service & Support

- Our dedicated, focused client service experts will help you manage and support the full scope of DNS needs

Flat-Rate Pricing Without Overages

- An industry-first: flat-rate fee for 12 months with no overage
- Forecast DNS spend on your fiscal planning cycle

Platform Integration

- Manage domains & zones from a single, secure SSO login
- Easily redirect, park, or use a template when adding new domain

Ultimate DNS Resilience With Our Unique Offering of a Multi-Provider DNS Network

- Four Anycast clouds spread over 40 geographic locations answer DNS queries rapidly around the globe
- Your DNS records exist simultaneously at two separate edge providers for maximum redundancy

Full API Capabilities

- Perform DNS modifications, web redirects, and various system integrations using our modern API
- Export DNS records and audit logs into SIEMs or other platforms

✓ **Premium DNS Management Security**

Markmonitor delivers industry-leading domain name, SSL certificate, and DNS management solutions built with exceptional security to protect your valuable domain assets. Reduce your company's security vulnerabilities and minimize the likelihood of DNS attacks with our comprehensive suite of security-focused products trusted by organizations globally.

1 Service Level Agreement terms are found in the contract.

2 Large-scale DNS usage (thousands of zones, billions of queries) may have different term

✓ **Features of Markmonitor Premium DNS Management**

Robust, Multi-Provider, Anycast Networks:

- No need to add other providers for redundancy.

Service Level Agreement:

- Guarantees 100% uptime.

Real Time Propagation:

- Changes and updates to DNS records propagate globally within minutes.

Easy On-Boarding:

- Bulk-import multiple zones and records from other providers.

SPF Wizard:

- Create valid TXT records to enable the Sender Policy Framework.

Subdomain Redirect:

- Add web forwarding records for different hostnames and URL path persistence.

Deep Linking:

- Use wildcard and path rules to persist unique identifiers for web redirects.

Primary and Hybrid Zones:

- Ability to set WebForwarding and use other DNS records within the zone.

Multiple Exports:

- Extract zones and records in standard formats or spreadsheets.

Simplified Zone Creation:

- We make it easy: redirect, park, or use a template when registering or transferring domains.

Controlled Access:

- Grant read/write privileges based upon groups of zones.

Audit Logging:

- Track every change, by everyone.

✓ **Superior Client Services and Support**

Our dedicated, focused client service provides the unique combination of always on-call Domain Portfolio Advisors with value-added consultative services. Our corporate-specialized, experienced strategy team keeps enterprise domain portfolios aligned with evolving client business priorities.

✓ **Expertise and Advocacy**

Markmonitor experts are connected to an unparalleled domain ecosystem of partnerships and relationships with industry advocacy groups, professional domain associations, registries and other registrars. Count on Markmonitor to be a vocal advocate for internet policy that securely establishes and protects the domain ownership rights of our customers.
